

2023 BNEF and Taipower Summit (R&D Planning Office: Chang, Hsiang-Lin)

- I. BNEF (Bloomberg New Energy Finance) is a research institution dedicated to developing opportunities for professionals in the energy field. It provides incisive insights from the world's most detailed and exclusive proprietary database and presents investment, economic and policy trends in emerging energy technology fields. To grasp the international information trends, TPC has joined as a BNEF basic corporate member since April 2021. Membership benefits include 10 official accounts (access to research reports, databases, models, tools, various seminars, etc.), monthly 120-minute analyst telephone consultation service, and assisting TPC in planning and handling large-scale seminars.
- II. On March 2, Ali Izadi, the Head of Asia-Pacific research in BNEF, led 5 members to participate in the Summit Meeting with Mr. Wang, the President of TPC, Deputy General Manager Pu, and members of R&D Planning Office and Electric Economics & Social research office. According to the operation status of TPC, BNEF provides a customized professional analysis of electrical industry trends to discuss and exchange opinions with TPC representatives. During the meeting, BNEF shared the transformation paths of major countries worldwide and analyzed their potential economic and policy-related impacts. In this meeting, both BNEF and TPC focused on the topics of "the relevant strategies and actions of the global electricity industry to formulate electricity prices", "the impact of Japan's restart of nuclear power on electricity prices and case descriptions." The relevant information discussed in the meeting can be used as a reference for TPC's future business planning.
