

## **IERE visited TPRI on August 8, 2019**

(R&D Planning Office: Ms. Hsiang-Lin Chang)

IERE (International Electric Research Exchange)

Secretary General Dr. Takao Watanabe and IERE Director Dr. Masahiro Nagano paid a visit to TPRI (Taiwan Power Research Institute) on August 8, 2019 to discuss the topics of Methanol Ageing Marker Project and Technology Foresight Activity. They were received by TPRI General manager Dr. Chung, accompanied by Deputy General Manager Mr. Shen, Deputy General Manager Dr. Pu, Section Chief Mr. Li and Acting Director Dr. Chen.

The meeting was held at TPRI headquarters. The discussion topics were as follows:

1. Current status and recent activities of IERE
2. R&D “Methanol Ageing Marker Project”
3. IERE Technology Foresight 2020
4. 2019 PIESA-IER South Africa & 2020

IERE-CSIRO Brisbane Forum

In his greeting speech, Dr. Watanabe first introduced the current and incoming activities of IERE. He more than one time invited TPRI to participate in the phase II meeting of Methanol Ageing Marker Project and the 2019 PIESA-IER South Africa & 2020 IERE-CSIRO Brisbane Forum.

Acting Director Dr. Chen had some questions about the background and investigation methodology of Technology Foresight 2020 for Dr. Takao Watanabe, and she got detailed answers in return.

The meeting with IERE was a big success. IERE and TPRI looked forward to having more opportunities to discuss the development of new electric technologies in the near future.
