

The 32nd CRIEPI/TPC General Meeting

(R&D Planning Office: Chang, Hsiang-Lin)

- I. Since TPC and CRIEPI signed a cooperation agreement in 1988, we have taken turns to host the annual meeting. Discussions and opinion exchanges between both sides on electrical technology R&D topics will help TPC continue to acquire new knowledge on electrical industry research and development, improve R&D skills, and promote technological cooperation between Taiwan and Japan.
- II. On January 12, 2023, Dr. Takashi NISHIHARA led 7 CRIEPI members to participate in the 32nd CRIEPI/TPC General Meeting. In this meeting, 12 presentations on topics of “R&D Strategy,” “Asset Management,” “Coal/Ammonia Co-firing Fuels,” “Current Status of Offshore Wind Power,” “Operation and Maintenance for Offshore Wind Power,” and “AI for Power Forecast” were reported. Before the meeting, members of CRIEPI visited Mr. Wang, the President of TPC, accompanied by TPRI. They exchanged opinions on the electrical industry’s new technology, research, development direction, and the company's business philosophy. President Wang appreciated the long-term friendship established by the two parties and hoped to exchange technology and experience through annual meetings.
- III. The topics of the 32nd CRIEPI/TPC General Meeting
